ABOUT US

HOPE DESIGN STUDIO LLP

INTERIORS & FURNISHINGS

HOPE is an interior fit-out and furnishings solution provider. We execute projects to the drawings and specifications given by clients, interior designers and architects.

We build and deliver complete interiors and custom furniture across India, for residential, commercial, hospitality and retail projects, working in metal, wood, marble, stone and composites.

"Complete interior solutions, built with our own infrastructure and handed over on time."

WHY HOPE

Infrastructure, capacity, quality, responsibility

01 Infrastructure

Wood, metal and finishing divisions across five premises: CNC laser cutting, bending and V-grooving, PVD coating, paint booths and laminates under our own roof.

02 Capacity

Large-scale execution across India, with production running in parallel across divisions so multi-floor and multi-site projects stay on programme.

03 Quality

Every product checked against the drawings and the approved sample for dimensions, durability and finish before it leaves the workshop.

04 Responsibility

One accountable contractor from approved drawings to handover: shop drawings, manufacturing, delivery and installation.

05 Timely handover

A single programme, weekly progress reporting and phased delivery, so the site opens on the agreed date.

06 Solution provider

Interiors, joinery, metalwork, display systems and loose furniture from one partner, made to your drawings and specifications.

CONTACT

Execution, manufacture and delivery

01

Solution provider

Complete interior fit-out and furniture from one partner, executed to approved drawings for homes, workplaces, hospitality and showrooms.

02

Infrastructure

Five premises totalling 15,000 sq. ft with wood, metal and finishing divisions and a technical drawing cell.

03

Capacity

Large-scale project execution across India, with pan-India delivery and installation teams.

04

Quality

Strict durability and finish checks on every product, matched to approved samples.

05

Responsibility

Single-point accountability from shop drawings to snag-free handover.

06

Timely handover

Programme-led delivery with weekly reporting and phased installation.

From drawings to handover

Six stages, built to approved drawings

01

Drawings & specifications

We receive the design drawings, specifications and BOQ from the client or interior designer and study them in detail.

02

Site survey

Measure the site and check it against the drawings; raise any queries with the designer early.

03

Shop drawings & samples

Prepare fabrication drawings and finish samples, and submit them to the designer for approval.

04

Manufacturing

Joinery, metalwork, display systems and furniture made in our own workshops to the approved drawings.

05

Quality checks

Every product checked against the drawings for dimensions, durability and finish before dispatch.

06

Installation & handover

Site execution, snagging with the designer and client, and a final walk-through.

Drawings and approvals

STEP	STAGE	WHAT WE DO	OUTPUT / APPROVAL
01	Drawings received	Collect design drawings, specifications, BOQ, brand guidelines and target dates from the client or designer.	Drawing register opened
02	Drawing study & queries	Check drawings for buildability, missing details and material availability.	Query list (RFI) sent to the designer
03	Site survey	Measure the site and check levels, services and existing conditions against the drawings.	Site report, deviations flagged
04	Costing & quotation	Price the work item by item against the BOQ and specifications.	Quotation / BOQ agreed
05	Shop drawings & samples	Fabrication drawings, finish samples and mock-ups prepared from the designer's drawings.	Designer's approval on drawings and samples

Production, site and handover

STEP	STAGE	WHAT WE DO	OUTPUT / APPROVAL
06	Procurement	Order materials, hardware and finishes exactly as specified and approved.	Purchase orders, delivery schedule
07	Manufacturing	Wood and panel processing, metal cutting, bending and welding, finishing and PVD, to approved shop drawings.	Production tracker updated
08	Quality control	Dimension, finish and fit checks against the drawings before anything leaves the workshop.	QC checklist signed
09	Site execution	Installation to the approved drawings, coordinated with the designer's site visits and other trades.	Site diary and progress reports
10	Snagging & handover	Joint inspection with the designer and client, snag list closed, final clean and walk-through.	Handover documents and care guide

Hierarchy and responsibility

Every project has one owner at each level, and every hand-over between teams is recorded, so responsibility is never shared or lost.

Management

Partners: overall responsibility, client relationship, commercial approvals and resources for each project.

Project manager

One per project. Programme, coordination with the client, designer and PMC, weekly reporting; the single point of contact.

Technical drawing cell

CAD engineers: shop drawings, fabrication details and quantity take-offs from the approved drawings.

Procurement & stores

Materials, hardware and finishes bought to specification; deliveries checked and issued against the drawing list.

Quality controller

Independent of production: inspects at each stage and signs the QC checklist before dispatch.

Wood division head

Joinery, panel processing, edge banding and sanding; delivery of every wood item to programme.

Metal division head

Laser cutting, bending, V-grooving, welding, polishing and casting; delivery of every metal item.

Finishing & PVD head

Paint booths, laminates, Corian, engraving, printing and PVD coating to the approved sample.

Site supervisors & installation teams

Installation to approved drawings, daily site diary, protection, housekeeping and safety on site.

Accounts & documentation

Invoicing against milestones, drawing register, submittal log and the handover file.

One owner per item · Recorded hand-overs · Daily coordination · Escalation

What we keep and what we make

Wood & panels

- Natural and engineered veneers
- Plywood, MDF and particle board
- Solid wood for frames, turning and mouldings
- High-pressure laminates and edge bands

Metal

- Stainless steel (304 and 316 grades on request)
- Mild steel sections, sheets and pipes
- Brass and aluminium
- Perforated and expanded metal sheets

Stone & solid surface

- Marble and granite tops
- Engineered stone
- Corian and other solid surfaces (thermoformed in-house)

Glass & others

- Toughened, back-painted and mirror glass
- Acrylic and polycarbonate
- Fabric and acoustic panels
- Composites and cladding panels

Finishes

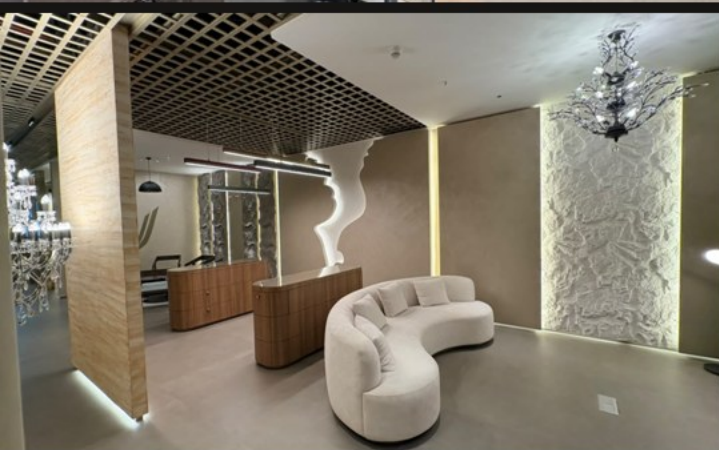

- PVD: champagne gold, gold, silver, rose gold
- Powder coating in any colour
- Electrophoretic coating
- PU, lacquer and special finishes

CUSTOM HARDWARE SOLUTIONS

Made when the catalogue does not have it

Where a project needs a handle, bracket, leg, hinge plate, display fixture or fixing that no catalogue supplies, our metal division makes it: laser-cut, bent, welded, polished and PVD-finished to the drawing. Standard hardware (hinges, drawer runners, locks, glass fittings) is procured to the specification and tested on the piece before dispatch.

- Handles, pulls and trims in stainless steel or brass with PVD tones
- Brackets, legs, frames and concealed fixings
- Display hooks, rails and product holders for showrooms
- Signage frames, letter supports and light-box housings
- Gates, grilles and railings to drawing
- Prototypes tested on the actual joinery before production

THE PROJECT

Jaquar Bath + Light Experience Centre

Chandigarh · executed by HOPE

Jaquar presents its orientation centres as places to experience complete bathroom and lighting solutions first-hand, from faucets, showers and sanitaryware to LED lighting.

The tour runs floor by floor: Ground Floor reception and wellness, First Floor bath collections, Second Floor luxury bath gallery and the Third Floor lighting and meeting spaces.

KEY FEATURES

What makes the Chandigarh centre work

01

Four themed floors

Ground to Third Floor, each with its own palette and purpose.

02

Wellness experience

Spa pools, sauna and steam cabins presented as complete settings.

03

Feature ceilings

Timber slats, open grids and black slatted ceilings with linear light.

04

Sculpted feature walls

Stone-effect, textured and relief walls that show off light and product.

05

Living lighting displays

Landscape gardens, chandeliers and a dedicated lighting corridor.

06

Spaces to consult

Lounges, consultation counters and two meeting rooms for client discussions.

Outdoor lighting walk

A path through planted beds lit by bollards, pole lights and step lights.

KEY POINT

Bollards, pole and step lights light a real path through planting.

Perforated screen & textured wall

Perforated metal screen
panels before a sculpted wall,
lit from below.

KEY POINT

Light from below reveals the
texture of the sculpted wall
behind the screen.

Sculpted wall grazing

Spotlights grazing a deeply textured wall above a planted, cove-lit bed.

KEY POINT

Grazing spotlights show how lighting brings out wall texture.

Branch light feature

A recessed branch-pattern
linear light across the corridor
wall.

KEY POINT

The branch-pattern linear light
doubles as a wall graphic.
